Alan Kraft  
250 E 63 St.  
NY - NY -

Dear Alan,

I am writing to tell you of a definite improvement in my physical condition since I have been treated by you. I have had an inflammation of the cartilage of the knee for 7 months, which had not responded to medical treatment. Physical therapy & pain pills did not help. After our last session I was able to walk 3 miles. I have been in a weakened condition from Hodgkin's Disease & prone to many infections. I have suffered great pain from abdominal abscesses, which could not be alleviated by pain medication. Now the pain is gone & the abscess is gone. I feel stronger, & have gained 10 pounds. I am able to walk with greater ease.

My friends have noticed the improvement, & it is as if I am a different person. For a long time I have been living as shadow of my former self.

due to pain & weakness, you  
have helped me immeasurably.  
My physical health is improving  
and I have hope of regaining  
my health, strength & vitality -

With much  
gratitude,

Sharon Latterman
