

Sept. 8, 1976.

Dear Mr. Kraft,

This brief note is simply to let you know of the tremendous benefits I have received from your healing treatments within the recent past.

My prostate condition no longer bothers me: there are no longer any symptoms of excessive urination, no getting up at night. The condition has entirely cleared up. Your treatments worked.

And, likewise, my distressful breathing difficulties - St. Vincent's Hospital Breathing Clinic classified it as incipient emphysema - have vanished completely. My breathing is now as normal as it ever was. Again, your treatments worked.

With greatest gratitude to you, I remain,
Seymour Loew.
