

Sept 2, 1976

Dear Mrs. Kraft

When I discovered a lump in my breast I went to see Dr. Cornetta. After examining me he told me to see a doctor who specializes in diseases of the breast. I then went to see Dr. H.P. Leis Jr. He ordered a mamogram after his examination. The diagnosis was tumor right breast; simple left breast. He advised excision of tumor and biopsy of left breast.

I saw Dr. Leis Jr on Aug. 3, 1976 and Aug. 6, 1976. I then went to see Dean Kraft. The date was Aug. 1976. After one healing session with Mrs. Kraft I went to another Doctor by the name of Dr. C. Haggensen. He examined me on Aug 13, and Aug. 31, 1976. His examination showed no disease tract in either breast and that my x-ray was normal. He advised no biopsy.

Respectfully yours,
Mrs. Dora Vasallo
